

# WANTED

## *Emerald Ash Borer*

*EAB adult*

### *PREVENT EAB FROM INFESTING GEORGIA*

*EAB larva*

EAB ...

- ✿ Is an exotic beetle from Asia.
- ✿ Has killed millions of green ash trees.
- ✿ Was discovered in the United States July 2002.
- ✿ Is likely to spread via nursery trees, logs, firewood.

Look for signs: larva, larval galleries, and epicormic branches (see photos).

If you see this insect or signs of it, please contact your nearest GFC office.

*"D"-shaped exit hole of EAB*

*EAB larval galleries*

*Epicormic branching due to EAB attack*
